**Amer Z. Aldeen MD, David H. Rosenbaum MD : 1200 Questions to Help You Pass the Emergency Medicine Boards** before purchasing it in order to gauge whether or not it would be worth my time, and all praised 1200 Questions to Help You Pass the Emergency Medicine Boards:

Monastero Many questions here but only a few that are bread and butter Emergency Medicine. Many seem to be preparing us for the Internal Medicine Boards since there are numerous questions that seem to be related to issues and treatments that will not be diagnosed, started, or even treated in the Emergency Department. When question pertinent to EM are presented, they are mixed with minutia details that reflect the bias toward the Internal Medicine Boards. The field of Emergency Medicine is comprehensive enough that the additions of minute and confusing (often conflicting) answers does little to the preparation for the ER Boards. Straightforward questions about straightforward conditions that are seen in every Emergency Department would be difficult enough and should be the

focus of such a preparation book. It seems at times, this book goes out of its way to be as cryptic or deceptive as possible. 7 of 7 people found the following review helpful. Great Volume of Questions, but many Superfluous ones By J. Morton This book is good because of the sheer number of questions it offers however these questions are not very representative of what appears on the in-service for residents. PEER Review is definitely better. There are also many questions that I believe are more opinion based on practice style than actually grounded in facts. Also there are many questions that go beyond the scope of EM and seem to be included just so they can reach their 1200 number. 0 of 0 people found the following review helpful. Great By junyamint I got an 88 in combo with Rosh Review. I would say these are the best resources out there that I know about. And I've looked at many. However, remember if you're a question person this is for you. Otherwise look at HippoEM or review books.

1200 Questions to Help You Pass the Emergency Medicine Boards, Second Edition is a unique resource designed to help emergency medicine residents and physicians pass their exam on the first attempt. This review book contains 1200 questions and answers that mimic both the in-service residency exam and the board exam in emergency medicine. The tests are randomly divided into 12 individual tests of 100 questions, one for each area of emergency medicine: internal medicine and surgery specialty areas, dentistry, trauma, obstetrics, pediatrics, toxicology, environmental, psychiatry, radiology, dermatology, EMS, and bioterrorism. Most of the questions are case-based and 10% involve interpreting an image. The book also provides concise rationale for the correct and incorrect answers to help you identify your strengths and weaknesses and fully understand the material. The questions in the book are designed to be slightly more difficult than the average question in ABEM's Written Qualifying Examination to adequately challenge your existing knowledge and help you better prepare.
