Alice Covell : 2010 Coding Workbook for the Physician's Office (Coding Workbook for the Physician's Office (W/CD)) before purchasing it in order to gauge whether or not it would be worth my time, and all praised 2010 Coding Workbook for the Physician's Office (Coding Workbook for the Physician's Office (W/CD)):

This workbook contains coding exercises that reference sections of the CPT and ICD-9-CM coding manuals. Exercises requiring HCPCS Level II codes are also included in the workbook. Condition and procedure statements in the exercises reflect the current annual editions of the coding manuals. By completing the exercises, you will expand your

medical vocabulary, improve coding skills for the physician's office, and learn to code only what the documentation supports. The Center for Medicare and Medicaid Services (CMS) guidelines for diagnosis coding and reporting by physicians are also covered in the workbook. Learners need current CPT, ICD-9-CM, and HCPCS coding manuals to complete the exercises.

The Coding Workbook is completely doctor-office based which is what we focus on in our program. The diagnostic and procedural statements are ones that the students will encounter once they are on internship or hired for a job. This is a great addition to the book that we currently use and would enhance the learning of our students! About the Author Alice Covell, CMA-A (AAMA), RMA, CPC, is a partner with Covell and Harwood Company, a Kalamazoo, Michigan-based consulting firm. She consults with physician practices and healthcare facilities on coding issues, billing compliance, and office management. Ms. Covell is also popular presenter on coding issues at seminars.
