**Riane Eisler, Teddie M. Potter : 2014 AJN Award Recipient Transforming Interprofessional Partnerships: A New Framework for Nursing and Partnership-Based Health Care** before purchasing it in order to gage whether or not it would be worth my time, and all praised 2014 AJN Award Recipient Transforming Interprofessional Partnerships: A New Framework for Nursing and Partnership-Based Health Care:

1 of 1 people found the following review helpful. Refreshing and Relevant!By Dane OehlertThis innovative text provides a much-needed connection between healthcare outcomes and culture. It may well be the brave publication that finally creates a shift in healthcare delivery from fractured and siloed, to a system of healthcare providers that partner with each other, and with their patients and communities.This book is relevant not only to nursing but to

anyone that works in any healthcare setting. Dr. Eisler's cultural transformation theory gives healthcare a common theory and language to address issues of lateral violence, bullying and other healthcare wounds that plague the field. Dr. Potters BASE of nursing medicine applies to all those who care for patients, and provides a framework that outshines models that are still taught but are no longer applicable to today's healthcare needs. I applaud Dr. Eisler and Dr. Potter for this courageous book, and hope it is used in every nursing school (and school of pharmacy, medicine, occupational therapy, radiology.....) in the country!

*Transforming Interprofessional Partnerships: A New Framework for Nursing and Partnership-Based Health Care* provides nurses and other health care professionals tools to reexamine the current state of interdisciplinary partnerships in order to build a more effective, caring, and sustainable health care system. This comprehensive text will benefit nurses by defining and illustrating full partnership in practice, education, and research in order to improve communication and interprofessional collaboration.

About the Author Riane Eisler, JD, PhD(h), is founder and president of the Center for Partnership Studies and teaches in the leadership graduate program at the California Institute of Integral Studies. She is internationally known for her contributions as a systems scientist, attorney working for the human rights of women and children, and author of several books including *The Chalice and the Blade: Our History, Our Future*, now in 25 foreign editions, and *The Real Wealth of Nations: Creating a Caring Economics*. Eisler has written over 300 articles and has received numerous awards including the Nuclear Age Peace Foundation's 2009 Distinguished Peace Leadership Award. A survivor of the holocaust, Riane has been described as a cultural historian and an evolutionary theorist. She consults for businesses and governments on practical applications of the partnership model introduced in her work and keynotes at conferences, universities, and corporations internationally. Teddie M. Potter, PhD, RN, is a clinical associate professor and coordinator of the Doctor of Nursing Practice in Health Innovation and Leadership and Director of Inclusivity and Diversity at the School of Nursing at the University of Minnesota. A practicing nurse for over 30 years, Potter is internationally known for her collaborative care models and speaks on inclusivity and diversity in health care and the partnership paradigm in nursing education, practice, and research.
