The book arrived before the time line...Thanks to the seller!...0 of 0 people found the following review helpful. Five StarsBy Ricardo SimmonsPrice was good, book very helpful4 of 4 people found the following review helpful. you would be better off purchasing the AMA's versionBy T. C. KennedyThis AAPC version of the AMA's HCPCS Level II Expert Coder manual for coding procedures in the medical facility has some glaring omissions, apparently left out by AAPC in the production/proofreading process. Important chapter descriptors are missing; so, unless you have access to these descriptors from another source and wish to enter them by hand somewhere in your manual, you would be better off purchasing the AMA's version.
