United States Army : 68W Advanced Field Craft: Combat Medic Skills before purchasing it in order to gage whether or not it would be worth my time, and all praised 68W Advanced Field Craft: Combat Medic Skills:

6 of 6 people found the following review helpful. Combat medic BookBy Mark RThis is the book the Army should have been supplying to all Combat Medic trainees when I went through my course. I went ahead and bought it while in the course and found it to be perfect to go along with the class syllabus. I easily passed all my exams and continue to use it as a reference 4 years later.0 of 0 people found the following review helpful. Great complement for the tc3.By Cliente de Best medicine knowledge you can buy. Perfect complement for your tc3 and phtls. A whole vision about tactical medicine and prehospital trauma. Great contents and very illustrative. Prehospital Medicine is my passion, 68w my choice.1 of 1 people found the following review helpful. Well rounded.By OG MedicThis book will make you well rounded and will give you up to intermediate level knowledge in every area. It's more if an attempt to give you a somewhat of a formal overview and not so much a field manual for quick reference. Great book though, it put me way ahead as a combat medic.

The Combat Medic of today is the most technically advanced ever produced by the United States Army. Such an advanced technician requires an advanced teaching and learning system. 68W Advanced Field Craft is the first textbook designed to prepare the Combat Medic for today's challenges in the field. The ability to save lives in war, conflicts, and humanitarian interventions requires a specific skill set. Today's Combat Medic must be an expert in emergency medical care, force health protection, limited primary care, evacuation, and warrior skills. 68W Advanced Field Craft combines complete medical content with dynamic features to support instructors and to prepare Combat Medics for their missions.
