Sara A. Beazley : A Brief Guide To The U.S. Health Care Delivery System: Facts, Definitions, and Statistics, Second Edition before purchasing it in order to gage whether or not it would be worth my time, and all praised A Brief Guide To The U.S. Health Care Delivery System: Facts, Definitions, and Statistics, Second Edition:

1 of 1 people found the following review helpful. Description of like new very accurrate!By T. KeenanI appreciate that this was indeed like new as I have was purchasing several of these for a sales staff meeting and wanted to save money, yet give everyone a nice copy of their own.

An updated, quick-study reference and introduction to U.S. health care system providers, payers, regulators, clinicians, and their patients. Its easy to use question-and-answer format presents compelling facts and pertinent data on emerging trends, plus details on hospital department infrastructure. The book provides a concise overview with particular emphasis on the hospital and is meant as a short introduction to a very complex subject. Each chapter takes a major segment of the system and provides basic information, data, and coverage of major current issues. Each question-and-answer entry serves as a quick reference for the topic being addressed. Taken as a whole, the book presents a solid view of how the various constituencies in health care fit together. Authoritative, primary sources are used extensively throughout the book. Complete bibliographic citations, including Websites, are provided in reference lists.

This compact primer and fact-laden reference does a great job of organizing and explaining the health care field. In ordinary times, all hospital trustees should read it and pack it with them, and it wouldn't do management and clinical leaders any harm, either. In this extraordinary time of health care reform, the book would help any American consumer to better understand what will be happening in the field for years to come. --Rick de Filippi, Chairman American Hospital Association
About the Author Sara A. Beazley, editor, is a senior information specialist at the American Hospital Association Resource Center. Beazley participated in the cooperative arrangement with the National Library of Medicine to produce the Health Planning and Administration Database; she also oversaw the production of the Hospital and Health Administration Index. She has a master's degree in library science from the University of Chicago.
