In 1958, based on thirty years of clinical experimentation, Dr. Max Gerson published this medical monograph. This is the most complete book on the Gerson Therapy. Dr. Gerson, who developed the Gerson Therapy, explains how the treatment reactivates the body's healing mechanisms in chronic degenerative diseases. The book incorporates extensive explanation of the theory with scientific research and the exact practice of the therapy, as well as a presentation of fifty documented case histories. Also included is a modified version of the Gerson Therapy for use with nonmalignant diseases or preventative purposes.
