praised *A Fragmented Landscape: Abortion Governance and Protest Logics in Europe* (Protest, Culture Society):

Since World War II, abortion policies have remained remarkably varied across European nations, with struggles over abortion rights at the forefront of national politics. This volume analyses European abortion governance and explores how social movements, political groups, and individuals use protests and resistance to influence abortion policy. Drawing on case studies from Italy, Spain, Norway, Poland, Romania, Russia, Sweden, Switzerland, the United Kingdom and the European Union, it analyses the strategies and discourses of groups seeking to liberalise or restrict reproductive rights. It also illuminates the ways that reproductive rights politics intersect with demographic anxieties, as well as the rising nationalisms and xenophobia related to austerity policies, mass migration and the recent terrorist attacks in Europe.

"This is an extremely important contribution to the literature on the policies and politics surrounding reproductive rights. It covers a range of historical developments and national contexts while developing multiple overarching themes in an accessible manner." · Jennifer Merchant, Université Paris II
