Marilyn Takahashi Fordney, Jaon Johnson Follis : Administrative Medical Assisting (Wiley Medical Publication) before purchasing it in order to gage whether or not it would be worth my time, and all praised Administrative Medical Assisting (Wiley Medical Publication):

0 of 0 people found the following review helpful. Out of date for current classroom use, but still good knowledgeBy Pretty-Smart-ShopperThis book is out of date but the information in it is still useful. It just won't do too well for use in a classroom where they recommend using the latest edition. Finding the assignment chapters and pages will be difficult because the newer editions have significantly more added pages and chapters.0 of 0 people found the following review helpful. Better than described! FAST shipping!By CustomerEverything I needed and more AHEAD of time.. Thank you!0 of 0 people found the following review helpful. Great BookBy O. DThis book was purchased for a very low price, and was in great condition when I received it. The seller did a great job in maintaining the book and I would definitely purchase from them again.Thank you Seller!!!

This spiral-bound worktext is specifically designed for learning administrative, or 'front office', medical assisting skills. This second edition contains new information on HMOs, PPOs IPAs, DRGs, APGs, Medicare and CHAMPUS. The book provides both theory and reference material, as well as simulated work situations that duplicate real-life work experiences. It contains full-size, actual forms and materials used by medical assistants - there's no need for supplements. Performance objectives, end- of-chapter questions, medical terminology, and chart notes are included.

The previous edition of this book was published in 1982.

About the Author Marilyn Takahashi Fordney, CMA-AC has authored and coauthored over 50 textbooks for two major publishers. In 2004, *Administrative Medical Assisting, Fifth Edition* won the William Holmes McGuffey Award in Life Sciences from the Text and Academic Authors Association.
