From Academic Press : Adolescent Addiction: Epidemiology, Assessment, and Treatment (Practical Resources for the Mental Health Professional) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Adolescent Addiction: Epidemiology, Assessment, and Treatment (Practical Resources for the Mental Health Professional):

0 of 0 people found the following review helpful. Great Resource and College TextBy Jim LawsonIf you are a student or a clinician in the field of addiction and substance abuse this is a great resource for your library.0 of 0 people found the following review helpful. Five StarsBy JFexcellent0 of 0 people found the following review helpful. Great read!By shanet23Full of information needed to complete my course, easy to understand and take notes. I would highly recommend this book.

Adolescent Addiction: Epidemiology, Assessment, and Treatment presents a comprehensive review of information on adolescent addiction, including prevalence and co-morbidity rates, risk factors to addiction, and prevention and treatment strategies. Unlike other books that may focus on one specific addiction, this book covers a wide range of addictions in adolescents, including alcohol, cannabis, tobacco, eating, gambling, internet and video games, and sex addiction. Organized into three sections, the book begins with the classification and assessment of adolescent addiction. Section two has one chapter each on the aforementioned addictions, discussing for each the definition, epidemiology, risk factors, co-morbidity, course and outcome, and prevention and intervention. Section three discusses the assessment and treatment of co-morbid conditions in greater detail as well as the social and political implications of adolescent addictions. Intended to be of practical use to clinicians treating adolescent addiction, the book contains a wealth of information that will be of use to the researcher as well. Contributors to the book represent the US, Canada, the UK, New Zealand, and Australia. About the Editor: Cecilia A. Essau is professor of developmental psychopathology at Roehampton University in London, UK. Specializing in child and adolescent psychopathology, she has been an author or editor of 12 previous books in child psychopathology and is author of over 100 research articles and book chapters in this area. Comprehensive with the state-of-the-art information on important and the most common adolescent addiction Easy to understand and organized chapters Written by international experts
