Donald P. Lewis : Advanced Protocols for Medical Emergencies: An Action Plan for Office Response (Lexicomp's Dental Reference Library) before purchasing it in order to gage whether or not it would be worth my time, and all praised Advanced Protocols for Medical Emergencies: An Action Plan for Office Response (Lexicomp's Dental Reference Library):

0 of 0 people found the following review helpful. Great referenceBy Larry J ManganelloI teach this information for a living and was very pleased to find this reference. Clear, concise and well organized. All Dental offices, whether providing sedation or not, should have a copy and PRACTICE an emergency a month during your meetings. Well

done.

"Advanced Protocols for Medical Emergencies" is a must for all offices administering nitrous oxide, conscious sedation and general anesthesia. This manual delivers critical information to the anesthesia team, helping to ensure protocols, prevention, preparation and management of office emergencies are an integral part of the normal office operation base. It features latest CPR and BLS (basic life support) guidelines. It includes office preparedness and staff training for management of emergencies. It contains procedures and protocols defined by symptom analysis. All emergency categories include a quick reference guide for initial treatment. There are 12 tabbed chapters for easy reference. Chapters are presented in most likely order of frequency.
