From Lin James C : Advances in Electromagnetic Fields in Living Systems before purchasing it in order to gauge whether or not it would be worth my time, and all praised Advances in Electromagnetic Fields in Living Systems:

Volume 2 in this series offers research into two specific regions of the electromagnetic spectrum: extremely low frequency fields and radiofrequency radiation, with particular emphasis on the latter. The investigations explore:

melatonin synthesis and exposure to extremely low frequency (ELF) fields ELF fields and cancer computational bioelectromagnetics health effects, including the carcinogenic potential of radiofrequency radiation radiofrequency radiation as an energy source for arrhythmia, and practical applications of the radiofrequency exposure standard.
