This book is packed with info, and it is a really great read, especially because many still have misconceptions about AIDS, America, and Haiti.0 of 0 people found the following review helpful. FantasticBy Nicolle EsparoRead this instead of Mountains Beyond Mountains. This book is written for a general

audience and does a way better job of conveying the actual situation in Haiti and Farmer's empathy toward the people there. 0 of 1 people found the following review helpful. *Aids ans Accusation* exceeded my expectations with it's tracing of ...By Dwight Underwood *Aids ans Accusation* exceeded my expectations with it's tracing of aids in Haiti. It paints a picture that at times can be extremely hard to process.

Does the scientific theory that HIV came to North America from Haiti stem from underlying attitudes of racism and ethnocentrism in the United States rather than from hard evidence? Award-winning author and anthropologist-physician Paul Farmer answers with this, the first full-length ethnographic study of AIDS in a poor society. First published in 1992 this new edition has been updated and a new preface added.

From Library Journal Physician and anthropologist Farmer studied the impact of AIDS on the impoverished people of Haiti, and his portrayal for his doctoral dissertation, of a small rural village--its clinic, religious life, folk healers, and voodoo beliefs--brings Haitian culture powerfully to life. He provides an extensive history of the country, finally exploring the connection between suffering and blame: Americans have blamed Haitians for "causing" AIDS, while Haitians have accused one another of "sending" it through sorcery. Rarely is a book based on a dissertation so engaging. Highly recommended for academic and subject collections.- Judith Eannarino, Washington, D.C. Copyright 1992 Reed Business Information, Inc. "This superbly crafted volume is dedicated to explaining and refuting a popular U.S. Belief that AIDS came to the United States from Haiti. . . . Farmer has made an outstanding scholarly contribution to the 'anthropology of suffering, ' the assessment of illness as perceived and experienced by a patient embedded in an interlocking fabric of culture and history. "-- "Medical Anthropology Quarterly From the Inside Flap Praise for the first edition: Farmers sensitive exploration of the lives and deaths of the people at [the village of] Do Kay give his study a distinctly human face and an emotional edge.... The book is at the same time fiercely personal and coldly objective. The result is both moving and illuminating. Science Farmer renders a richly layered and nuanced ethnographic portrait.
