A good model of the warBy Rebecca L. FisherI purchased this model for my son because he is going to a technical school to become a hearing instrument specialist. He enjoyed putting it together and then showing his sons the functions of the various parts of the ear. He said that it's not a replacement for the larger,more detailed models they work from at school, but then it's not supposed to be. It it a good quality item.0 of 0 people found the following review helpful. Perfect detail!By MelanieI ordered this chart to use in an art project and it is perfect. High quality paper and graphics.
