Bruce J. Colbert, Jeff Ankney : Anatomy Physiology for Health Professions (3rd Edition) (Anatomy and Physiology for Health Professions) before purchasing it in order to gage whether or not it would be worth my time, and all praised Anatomy Physiology for Health Professions (3rd Edition) (Anatomy and Physiology for Health Professions):

0 of 0 people found the following review helpful. Easy to readBy MegingtonThis book was suprisingly easy to read, and breaks a lot of concepts down to the simplest possible explanations. The images are large and clear, and the chapters are nice and short! There are a few cheesy jokes mixed in to keep it engaging too. Not bad for a required reading!0 of 0 people found the following review helpful. Good information but seems to have a lot of review ...By Marissa DillardGood information but seems to have a lot of review errors as far as their answers matching up with

what every other student has. For example everyone in class will have the same answer and the book is different. We look it up in the chapter and the books answer ups up being wrong 1 too many times. Confusing.0 of 0 people found the following review helpful. Five StarsBy Customereasy to read and use

For courses in Anatomy and Physiology for Health Professions. Understanding The Human Form Anatomy and Physiology for Health Professionals: An Interactive Journey is a hands-on study companion that guides nursing and allied health students through the systems of the human body. About the Author Bruce Colbert is the Director of the Allied Health Department at the University of Pittsburgh at Johnstown. He holds a masters in health education and administration, has authored nine books, has written several articles, and has given over 250 invited lectures and workshops at both the regional and national levels. Many of his workshops provide teacher training involving techniques to make the health sciences engaging and relevant to todays students. In addition, he does workshops on developing effective critical and creative thinking, stress and time management, and study skills. He is an avid basketball player, even after three knee surgeries, which may indicate that he has some learning difficulties. Jeff Ankney is the Director of Clinical Education for the University of Pittsburgh at Johnstown Respiratory Care program, where he is responsible for the development and evaluation of hospital clinical sites. In the past, Jeff has served as a public school teacher, Assistant Director of Cardiopulmonary Services, Program Coordinator of Pulmonary Rehabilitation, and a member of hospital utilization review, hospital policy, strategic planning and patient safety committees. He is a consultant on hospital management and pulmonary rehabilitation concerns. Jeff was also the recipient of the American Cancer Society Public Education Award. He is a pretty fair fly fisherman and wing shot, although his springer spaniel, Rusty, would probably disagree. Karen Lee is an Associate Professor in the Biology Department at the University of Pittsburgh at Johnstown, where she teaches all the anatomy courses, including anatomy and physiology for nursing and allied health students. She presents regularly at scientific conferences and has published several articles on crustacean physiology and behavior. An active member of the Council on Undergraduate Research, she is also the chair of the University of Pittsburgh at Johnstowns annual undergraduate symposium. For the last 17 years she has sung bass in womens barbershop choruses and quartets and more recently has been harmonizing with any singer or guitar player who will let her near the microphone.
