Robert F. Orlikoff, Nicholas E. Schiavetti, Dale Evan Metz : Evaluating Research in Communication Disorders (7th Edition) (Pearson Communication Sciences and Disorders) before purchasing it in order to gage whether or not it would be worth my time, and all praised Evaluating Research in Communication Disorders (7th Edition) (Pearson Communication Sciences and Disorders):

0 of 0 people found the following review helpful. BookBy michael bRequired reading for school6 of 7 people found the following review helpful. Worst Textbook Ever!By maidaprIf I could give it 0 starts I would. This textbook is the worst thing I have ever read. It uses vague language to explain difficult topics. Sometimes you find yourself reading the same sentence over and over and it still doesn't make sense. Seriously, please consider your audience when writing a textbook.0 of 0 people found the following review helpful. Five StarsBy DunkinDzFast shipping and as advertised

This carefully organized, engaging, comprehensive, and contemporary guide to analyzing research articles has become a classic in the field. With its primary focus on reading, understanding, and evaluating professional literature, and its emphasis on the different research designs and types of publications that can inform all components of evidence-based practice, *Evaluating Research in Communication Disorders, 7/e* gives readers a logical, highly useful organization that reduces redundancy and improves efficiency; focused study questions that help develop critical evaluation skills and guide student projects that involve the evaluation of research literature; and up-to-date references, current research, and new topics keep readers aware of the most contemporary findings in the field.

From the Back Cover This carefully organized, engaging, comprehensive, and contemporary guide to analyzing research articles has become a classic in the field. With its primary focus on reading, understanding, and evaluating professional literature, and its emphasis on the different research designs and types of publications that can inform all components of evidence-based practice, this text gives readers: Focused study questions that help develop critical evaluation skills and guide student projects involving the evaluation of research literature.
