From CRC Press : Exercise (Lung Biology in Health and Disease, Volume 52) before purchasing it in order to gage whether or not it would be worth my time, and all praised Exercise (Lung Biology in Health and Disease, Volume 52):

Fifteen contributed chapters deal with the major aspects of the effects of exercise on the respiratory system in health and disease. The chapters are organized into a logically sequential scheme of topics: beginning with pulmonary mechanics; continuing with pulmonary gas exchange, the pulmonary and
