5 of 5 people found the following review helpful. worth buyingBy CustomerThis is a great first choice book, for very

fast info. But it should be used with a more thorough book like: Sheehy's Emergency Care. Sheehy's has a lot more in depth information. But this book is fast, to the point, and directs you in what to look up, it is also smaller and easier to take to a fast-food restaurant so you can study while you eat. 1 of 1 people found the following review helpful. Perfect, Concise, No Nonsense! By Customer Upon graduating from nursing school, I immediately applied for ER jobs and landed one at the big local trauma center. I decided I didn't want to go in completely blind, and nursing school barely touched emergency nursing which is a specialty in its own right, so I downloaded this on my Android tablet. This is the most understandable, short sweet and to-the-point book I've found, and I enjoyed reading it! I start Monday and feel much more comfortable walking into work now. I may not know a fraction of what I need to (which is why we are trained for six months), but at least if I'm asked any questions I'll have an intelligent, educated answer! 2 of 2 people found the following review helpful. MUST HAVE! By Nursing in NY If you are a graduate nurse or new to the ED, this book is a MUST HAVE!! Much of the information in this book was covered in my ED orientation. This book gave me the working knowledge that I needed to jump start my ED training. Plus, this book provides a patho and nursing intervention review, including common meds used in the ED. Great book, highly recommend it if you are entering the ED.

The book is clearly written and concise and uses sidebars to highlight core concepts." Score: 90, 4 stars --Doody's Because ER nurses need to think fast and act fast... Fast Facts for the ER Nurse is an orientation guide and reference, designed specifically for new ER nurses and the preceptors responsible for their orientation. The chapters provide a brief overview of equipment, treatments, and drugs used to manage common disorders and conditions frequently seen in the ER. Critical information presented in each chapter includes disorder definitions, signs and symptoms, interventions, and critical thinking questions. With this guide, nurses can get the information they need fast in bullet-point lists. Each chapter is conveniently organized alphabetically by disease and disorder for quick access. The book serves as an organized, reliable, and thorough ER guide, ensuring a structured approach to orientation. All new ER nurses and their preceptors will find this book to be a reference they cannot do without. Key topics covered include: Cardiovascular Emergencies Disaster Response Emergencies Infectious Disease Emergencies Mental Health Emergencies Shock and Multisystem Trauma Emergencies Substance Abuse and Toxicologic Emergencies And many more!

From the Back Cover 3 About the Author Jennifer R. Buettner, RN, is a full time Registered Nurse at Jasper Memorial Hospital in McDonough, GA. She has nine years of ER Experience and 3 years of experience precepting new graduate nurses and new employees in the ER. Jennifer is Certified in ACLS, PALS, TNCC, and as a Nurse Preceptor (Rockdale Medical Center/2005).. She won the Faculty Award for the graduate who "has achieved excellence in both the academic and clinical settings and who best exemplifies the total integration of program philosophy to professional performance" (5/2002). She has developed an ER Orientation Packet and Education Course for a local hospital. Her proposed book comes from her inability to find an orientation manual that was sized and priced reasonably enough for Hospital ERs to purchase in sufficient quantities to provide all preceptors and all new ER Nurses. Jennifer has applied to take the Certified Emergency Nurse (CEN) Exam and plans to earn this important credential prior to the publication of her book. Excerpt. Reprinted by permission.
