**Robert McLean : Financial Management in Health Care Organizations (Delmar Series in Health Services Administration)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Financial Management in Health Care Organizations (Delmar Series in Health Services Administration):

0 of 0 people found the following review helpful. One StarBy CustomerNot reader friendly at all 0 of 0 people found the following review helpful. Doesn't explain muchBy AngieThis book doesn't explain things clearly. If you don't already know the subject, then it doesn't help much at all. I think that when you're looking to learn a subject that it's up to the writer to explain like you "don't" know. it doesn't! i just follow along with my instructor's in-class lecture to get information. 0 of 0 people found the following review helpful. Five StarsBy CustomerSUPER affordable! Fast shipping!

Financing of health care organizations is increasingly important in today's society. *Financial Management in Health Care Organizations* provides discussion on the fundamental principles of finance, accounting, and budgeting for both short-term and long-term assets and programs. Managers of health care organizations and those aspiring to become managers will find this an invaluable tool in helping to increase their understanding of the financial aspects of running and managing their businesses.

This is one of the best books I have read on explaining finance, especially as it relates to healthcare. In my opinion, the author has taken a subject that is extremely difficult for most people to understand and reduced it down to the basic elements. -- Michael S. Austrin, M.A.U.A. (Planning and Business Development - BJC Healthcare) Fundamental principles of finance are presented in this text on the financial aspects of running and managing a health care organization. The text employs case studies, modern financial theory, and a little bit of humor, and addressed all varieties of health care organizational structures, including hospital based, home health, managed care, and medical practices. Focus is in financial principals and decision making rather than accounting, with chapters on valuing assets, capital building, and managing long-term and short-term assets. Mc. Lean directs the Master of Health Services Administration Program at Creighton University. - SciTech Book News March 2003 About the Author Creighton University, Omaha, NE
