William N. Zelman, Alan Milikan, Michael J. McCue : Financial Management of Health Care Organizations:An Introduction to Fundamental Tools, Concepts, and Applications (1st Edition) before purchasing it in order to gage whether or not it would be worth my time, and all praised Financial Management of Health Care Organizations:An Introduction to Fundamental Tools, Concepts, and Applications (1st Edition):

1 of 2 people found the following review helpful. Right to the point!By ,SSI found it very consice, and at the same time understandable with lots of examples, and practical. It is very well customized for health care organizations. It's worth your time and your money!

Financial Management of Health Care Organizations offers an introduction to the most-used tools and techniques of healthcare financial management: healthcare accounting and financial statements, managing cash, billings and collections, making major capital investments, determining cost and using cost information in decision-making, budgeting, performance measurement and pricing.

From the Back Cover Financial Management of Health Care Organizations offers an introduction to the most-used tools and techniques of healthcare financial management: healthcare accounting and financial statements, managing cash, billings and collections, making major capital investments, determining cost and using cost information in decision-making, budgeting, performance measurement and pricing. The material is presented in an applied, practical, and accessible manner that readers will appreciate. Numerous examples are included from a variety of providers such as health maintenance organizations, home health agencies, nursing units, hospitals, and integrated health care systems. Spread sheet examples are used as much as possible to provide readers with tools that may be readily adapted to problems encountered in the work place. Complicated formulae are de-emphasized.

About the Author William N. Zelman is Professor in the Department of Health Policy and Administration at the University of North Carolina at Chapel Hill. His writing in the area of healthcare financial management has been widely published in both journals and books. In addition to his teaching duties, he conducts workshops in healthcare financial management for various healthcare professions. He is former Chair of the Association of University Programs in Health Administration's taskforce on Healthcare Financial Management. Michael J. McCue is a faculty member within the Department of Health Administration at Virginia Commonwealth University. His research interests include the financial analysis of multihospital systems, the cost/benefit analysis of telemedicine and the evaluation of hospital bond ratings and capital structure. He serves as Associate Editor of the Health Services Management Research. His empirical work has been published in the academic journals of Health Services Research, Inquiry, and Medical Care as well as other health care journals. Alan R. Milikan is currently an Associate Director with the Duke Health Network, an arm of Duke University Medical Center which develops hospital and physician networks. Prior to working at Duke, he was an administrator at UNC Hospitals over the Transplantation and Dialysis Programs.
