Benjamin Milder, Melvin L. Rubin : Fine Art of Prescribing Glasses Without Making a Spectacle of Yourself before purchasing it in order to gage whether or not it would be worth my time, and all praised Fine Art of Prescribing Glasses Without Making a Spectacle of Yourself:

10 of 10 people found the following review helpful. I wish I had read this soonerBy Val Zudans, M.D.I read this during my second year of ophthalmology residency and found it to be incredibly useful. It is easy to read with real,

hilarious cases to explain the optics. The authors have a great sense of humor. Believe it or not, optics can be funny. I checked it out from our library, but bought my own copy for home because it is so good.

Award-winning text can help every clinician -- beginning and experienced -- have more satisfied patients. Through 150 case studies, the book helps you solve everyday problems in refraction. It explores and explains the multitude of variables that can lead to patient complaints, giving logical answers to many different kinds of situations. The result will be more wise decisions in diagnosis and prescribing. Best Medical Book of the Year award (American Medical Writers Assn.).

From the Publisher "The most useful book I have. Other books sit on the shelf; this one gets used constantly."
