You may be more prepared to provide aid, but you will have no more say in patient care than the dude who did it on a weekend. If you are so interested that you want to take a class, take an EMT class instead - apply your knowledge and broaden your scope.0

It was very helpful and helped remind me of certain first aid skills even after being in EMS and nursing for 10 years. Had to have this for one of my BSN courses and thoroughly enjoyed it.0 of 0 people found the following review helpful. is the best textbook rental service I have found.By Michael BIt is what it is. A textbook. Not bad condition at all and only a few previous markings with hig lighters. The book is quite dated as far as graphics and images but the topic is still unchanged I suppose.

First Aid for Colleges and Universities , Tenth Edition, is intended for students in a full-semester course leading to First Aid/CPR certification. It is designed specifically for college-level courses in First Aid and meets American Red Cross guidelines, while providing more depth and detail than the other available texts in the market. In addition to comprehensive coverage of all first aid situations a responder is likely to encounter, this book provides self-tests, critical thinking exercises, and skill assessment checklists. The Tenth Edition features updated content aligned with the new 2010 AHA and ARC CPR Guidelines, which affect many critical procedures in the entire field. Content also reflects the current developments, updated pedagogy, and best practices. Illustrations and photos have also been selectively updated and refreshed throughout the book.

About the Author Keith J. Karren, Ph.D., EMT-B, is professor of Health Sciences at Brigham Young University, where he teaches First Aid and related courses. He is also the director of Emergency Medical Services (EMS), an educational service that offers continuing education for EMS personnel. He has been active in higher education for over 37 years, is the author of numerous EMS publications, and is an organizer of key EMS conferences.
