**Merrill J. Allen, Bernard S. Abrams, Arthur P. Ginsburg, Leslie Weintraub : Forensic Aspects of Vision and Highway Safety** before purchasing it in order to gage whether or not it would be worth my time, and all praised Forensic Aspects of Vision and Highway Safety:

About the Author Merrill J. Allen, O.D., Ph.D., Professor Emeritus of Optometry of Indiana University, School of Optometry, Bloomington, Indiana, has been involved in vision research and teaching since 1941. He has over 200 publications and nineteen awards to his credit. He has served as an expert witness in over 600 lawsuits. Bernard S. Abrams, O.D., is the founder of the Institute of Vehicular Safety. Over the years, his interest in night vision and vehicular accidents was enhanced by his work in electro physiological testing of the night vision of the aged. In addition, he has lectured about vision on three continents, has designed and built optical factories in several countries. Arthur P. Ginsburg, Ph.D., as founder and director of the Aviation Vision Laboratory at Wright-Patterson Air Force Base, Vistech Consultants Inc. and currently as director of Vision Sciences Research Corp., has worked extensively with pilots, astronauts and drivers under real and simulated visibility conditions to measure and demonstrate the effects of functional vision losses. Leslie Weintraub, O.D., is a graduate of Cornell University School of Business and the University of Houston College of Optometry. She has practiced for seven years as a medical optometrist, with emphasis in pathology.
