Marcia K. Anderson, Gail P. Parr, Susan J. Hall PhD : Foundations of Athletic Training: Prevention, Assessment, and Management (Sports Injury Management (Anderson)) before purchasing it in order to gage whether or not it would be worth my time, and all praised Foundations of Athletic Training: Prevention, Assessment, and Management (Sports Injury Management (Anderson)):

0 of 0 people found the following review helpful. Five StarsBy Jeff BaileyNice to have options buying college books0 of 0 people found the following review helpful. Perfect condition, exactly what I neededBy Houston CallawayThis book was exactly what was advertised, and was in great condition. I was very pleased to receive a book in that quality

state.0 of 0 people found the following review helpful. GreatBy sebastianBrand new book and knocked down price for minor bend of corner.

This text integrates basic medical concepts and related scientific information to provide a strong foundation of general athletic training practices. Using a problem-solving approach to prevention, recognition, assessment, management, and disposition of sports-related injuries and diseases, this text provides athletic trainers and athletic training students with the most extensive, challenging content in a user-friendly format. This edition features a full-color art program and more extensive injury photographs. Anatomy line art superimposed onto a real human helps students visualize the location of key muscles, nerves, and blood vessels. A companion Website on thePoint will offer a variety of student and instructor ancillaries.
