**Richard Beebe, Deborah Funk : Fundamentals of Emergency Care** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Fundamentals of Emergency Care:

1 of 1 people found the following review helpful. Better than Mosby or Brady By Dan After comparing the EMT book by Mr. Beebe to the Mosby and Brady book I found it much more in depth and easier to read. I learned a lot about becoming a good EMT and found myself reading ahead of the class to learn more from the book. This is an excellent textbook that should be used by all EMT instructors and EMT students. 0 of 0 people found the following review helpful. This is the EMS Bible! By Thomas W P Slatin In this book, Beebe presents himself as the top #1 expert on EMS and emergency care. This is with good reason, as his book is filled with useful facts, tricks of the trade, and scenarios based on real life cases. This is a must for any Paramedic student!

Fundamentals of Emergency Care has a complaint oriented, assessment based approach to the education of the EMT. It is designed to be taught using a problem-based learning approach. Problem based learning gives the EMT student an opportunity to learn the material in a more practical manner and one that is more natural to the adult learner. The most outstanding feature of Fundamentals of Emergency Care will be its emphasis on real life situations. The integration of the concepts of the emergency medicine into "real" life EMS on the streets, through case studies, will support the student as they try to apply the knowledge they learn in the classroom. Fundamentals of Emergency Care is intended to make book smart students into street smart EMTs through the use of problem-solving and critical thinking. All aspects of the Federal DOT 1994 EMT-Basic Curriculum are covered. "Fundamentals of Emergency Care by Beebe provides the required body of knowledge in a refreshing way. It incorporates many tools that will make it attractive to EMT students. It addresses several topics in a stellar fashion. It understands its target audience better than other texts. It is visually appealing and provides many devices that keep students interested. It succeeds in its endeavor to be informative and interesting and it raises the bar for others in terms of presentation." -- Mike Barnum, MD (University of California Davis Medical Center, Sacramento, CA) About the Author Richard Beebe, MS, BSN, NREMT-P is the program director for Bassett Health Care's Center for Rural Emergency Medical Services Education in Cooperstown, New York. He is also a Clinical Assistant Professor at the State University of New York at Cobleskill, New York. Richard Beebe is also a practicing field Paramedic with the Guilderland Police Department, since 1988. Richard Beebe has a Masters degree in education, is a registered Nurse and a nationally registered Paramedic. Richard Beebe has been an EMS educator for over two decades and is a chapter member of the National Association of EMS Educators. Mr. Beebe is a state and national speaker, author or editor of several textbooks, and has been recently working in a leadership role on the committee for the National EMS Education Standards of the National Association of EMS Educators. Deborah Funk M.D., FACEP is an Assistant Professor of Emergency Medicine at Albany Medical College in Albany, New York where she has been involved in EMS education and medical direction for more than a decade. Having completed an EMS Fellowship, Dr. Funk is a Medical Director for Life Net of New York and is involved in advancing EMS statewide.
