**Trudy Sandler Goldstein : Geriatric Orthopaedics: Rehabilitative Management of Common Problems** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Geriatric Orthopaedics: Rehabilitative Management of Common Problems:

This new edition of this very successful book is devoted exclusively to the practical management of everyday orthopaedic evaluations and problems in older adults. It includes the framework and exercises necessary to create successful orthopaedic rehabilitation programs for your elderly patients. New to this edition are expanded discussions of common surgical procedures; the addition of soft tissue problems and their rehabilitation; updated exercise programs; documentation tips in all treatment chapters; and a new chapter on balance intervention. The experienced clinician may access treatment ideas quickly for specific problems, while the student and novice clinician make use of a wealth of information on aging, general orthopaedics, and treatment protocols.
