In order to stay current and up-to-date in the business of your medical practice, I recommend reading, "The Physician's Survival Guide to the Business of Medicine, by Robert Katz, CPA. I have read the book and have significantly decreased my account receivables, increased my collections and even increased the number of new patients after implementing Mr. Katz's production and bonus program. This is a must read for every physician that has any concerns about the economics of

health care. Dr. Neil Baum Author of "Marketing Your Clinical Practice-Ethically, Effectively, and Economically" and Take Charge of Your Medical Practice-Practical Practice Management For the Managed Care Market"

This guidebook addresses the three major financial centers in every physician's life--the medical practice, the pension plan, and personal finances. Listing cases and examples, the author addresses these three interrelated financial centers in a two-phase process: how to conduct practice management review and then how to use this process to establish an ongoing system for successful total financial management. Plus, the second edition has new material on capitation, integrated delivery systems, mergers acquisitions and practice valuation, pensions, and dealing with managed care companies.
