Institute of Medicine, Roundtable on Evidence-Based Medicine : The Healthcare Imperative: Lowering Costs and Improving Outcomes: Workshop Series Summary (The Learning Health System Series: Roundtable on Value Science-Driven Health Care) before purchasing it in order to gage whether or not it would be worth my time,

and all praised *The Healthcare Imperative: Lowering Costs and Improving Outcomes: Workshop Series Summary* (The Learning Health System Series: Roundtable on Value Science-Driven Health Care):

The United States has the highest per capita spending on health care of any industrialized nation but continually lags behind other nations in health care outcomes including life expectancy and infant mortality. National health expenditures are projected to exceed \$2.5 trillion in 2009. Given healthcare's direct impact on the economy, there is a critical need to control health care spending. According to *The Health Imperative: Lowering Costs and Improving Outcomes*, the costs of health care have strained the federal budget, and negatively affected state governments, the private sector and individuals. Healthcare expenditures have restricted the ability of state and local governments to fund other priorities and have contributed to slowing growth in wages and jobs in the private sector. Moreover, the number of uninsured has risen from 45.7 million in 2007 to 46.3 million in 2008. *The Health Imperative: Lowering Costs and Improving Outcomes* identifies a number of factors driving expenditure growth including scientific uncertainty, perverse economic and practice incentives, system fragmentation, lack of patient involvement, and under-investment in population health. Experts discussed key levers for catalyzing transformation of the delivery system. A few included streamlined health insurance regulation, administrative simplification and clarification and quality and consistency in treatment. The book is an excellent guide for policymakers at all levels of government, as well as private sector healthcare workers.
