Charles White : The Hospital Medical Staff (Delmar Series in Health Services Administration) before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Hospital Medical Staff (Delmar Series in Health Services Administration):

This book is an important reference for hospital and medical staff leadership on how to perform medical staff functions of credentialing, privileging, reappointment, and peer review according to Joint Commission standards. Invaluable developmental information is also offered to administrative staff and Health Services Administration graduate students as an explanation of the origin of medical staffs, their managing systems, processes and challenges that affect administration.
