I received the book and it looked like I purchased a brand new bookBy TranI scored a hardcover textbook for 17 bucks in the used section! I received the book and it looked like I purchased a brand new book. Really impressed! It is just what my daughter needs for her course. From what I hear from her, it is an informative book, easy to read/learn, and has lots of visuals. She really likes the book. If you are interested in the sciences and the medical field, she really recommends it.0 of 0 people found the following review helpful. Five StarsBy Diana Ivett Canela DuarteExactly like an image
