Exposing the Real Danger of EMF'sBy SeaotterDid you know that fluorescent lighting, while more energy efficient, gives off way more EMFs than do incandescent bulbs which do not create radio frequency EMFs? Dr Fisher's book "The Invisible Threat, The Risks Associated With EMFs" gives valuable insight on how to shield you and your loved ones from these harmful emissions. Every health minded individual should read this concise but thorough, easy to understand book.For way too long the powers that be, influenced by the money hungry cell phone companies, have been telling us that EMFs pose no danger to our health. Dr. Fisher's book gives you a synopsis of the studies showing the very damaging effects of 60 Hz EMFs. In that chapter he gives an overview of the studies that have been done and the various diseases they have been shown to contribute to the incidence of. He also gives an excellent overview of the different types of EMFs and shares each types harmful effects on the body. He has a chapter detailing the dangers of cell phone EMFs. Dr. Fisher concludes with some excellent, common sense, easy to do suggestions on how to minimize your exposure to EMFs and make your home as safe from these ever present toxins as possible.0 of 0 people found the following review helpful. Dr. Fisher won't Tell us where he got his MEDICAL Degree!By Jon KnappI have tried hard as I can to find a source for Dr. Fisher's claimed M.B.B.S medical degree; but, Dr. Fisher directly refused to tell me!!; and his Boston affiliate chiropractor, and two people who are his friends (and spoke to him for me) couldn't get out of him and tell me where or how he got this medical degree, which he started listing along with his other honors in 2008. I think any "expert"

author who markets himself with a list of his degrees after his name should be forthcoming when the lay public requests verification of any of the degrees he lists...especially a degree which is an equivalent to an M.D. degree. The reputation of any book should start with its author. Update (12-8-14): We all now know why Chiropractor Fisher was so pushy about not giving anyone his references for his medical degree!! On Jan. 15th 2013, Fisher's Ontario chiropractic Board, after a year-long investigation, issued him three cautions regarding his credential claims. Fisher had to admit to his board that the Indian medical school that supposedly issued him his 5-year medical degree (and 1 year internship) DOESN'T EXIST, and NEVER EXISTED!! Fisher also admitted that he never attended one single day of instruction, internship, or clinics!! He claims he was awarded this prestigious degree after one interview by doctors (that he wouldn't name for the board's investigation committee) who were in with him in a future hospital scheme! But to this day Fisher still claims on his web pages to be director of TWO hospitals (both of which he also admitted to his board...don't exist)!! All of this is public record that can be obtained by writing for the Ontario College of Chiropractor's report. 1 of 1 people found the following review helpful. Dr. Fisher is an amazing author, presenter and foremost expert in the field of EMF!! By Linda M. Graziano Anyone who has read any of Dr. Fisher's books can clearly see he is an expert when it comes to understanding the pandemic extent that Electro-magnetic Frequencies (EMF) has on human biology. He clearly and easily articulates these facts through his writing style. I highly recommend it to all people and families that place cell phones in the hands of their children, use wi-fi in their homes, uses basic household electronics like alarm clocks, hairdryers, computers, microwave ovens and or drive electric cars - yes that means just about everyone! This problem is very real and Dr. Fisher's books are a must read for all people caring to know more about this. Remember a few short years ago when experts said that cigarette smoking did not cause cancer and that people are not effected by 2nd hand smoke.....now they have stopped cigarette smoking in public areas that include restaurants and bars. For some 20+ years the debate over cell phones causing cancer has been long discussed, just like the notion around cigarette smoking and cancer, and now there is enough evidence that supports cell phone usage can lead to cancer. So why not read this and get a plan in place to protect yourself and those you love - THE THREAT IS VERY REAL!!! Together we can do something to make a difference in the world. And that is what Dr. Fisher is trying to do - educate people on the very real risks of EMF! EMFs are not only tied to cancer but also fertility rates, depression, and other illnesses that are effected by this silent threat!

Dr Fisher discusses the links between EM Fields and diseases such as cancer, leukemia, Alzheimer's, Heart Disease, and others. Even childhood development issues and hormone malfunction are discussed. This easy to read book takes you from the effects of ionizing and non-ionizing radiation, the field strength of various household items, to how the effects of exposure to EM fields may be killing you.
