Sigrid Fry-Revere : The Kidney Sellers: A Journey of Discovery in Iran before purchasing it in order to gauge whether or not it would be worth my time, and all praised *The Kidney Sellers: A Journey of Discovery in Iran*:

0 of 0 people found the following review helpful. Five Stars By dyb Very informative and well written
0 of 0 people found the following review helpful. Four Stars By rosemarie tressler Good information.
1 of 2 people found the following review helpful. A Riveting Story about Live Organ Kidney Transplants And a Need For Action By Woodson J. Savage
The Iranian experience presented in this book offers a potential solution for America's growing dilemma where over 19,000 people die each year while on the organ transplant waiting list. Our current law which dates back

30 years now prohibits any meaningful form of compensation for live organ donors. In our society today, it is impractical to expect a sufficient number of donors to come forward out of pure humanitarian instincts and less than 1% of those who die each year end up being deceased transplant donors. This book paints a vivid picture of the dilemma we face in America if we do not change our current practices and laws. We can look forward to more deaths, continued poor quality of life for kidney diseased victims and much higher health costs. The most successful and cost effective solution is a live organ transplant!

Rarely does an adventure story carry such social significance as in this groundbreaking ethnographic research book. Dr. Fry-Revere's exploration of the medical ethics of compensating organ donors takes us deep inside Iranian culture to provide insight and understanding into how Iran has solved its kidney shortage. *The Kidney Sellers: A Journey of Discovery in Iran* addresses the question: How it is possible that in Iran there is a waiting list to be a donor, while in the United States hundreds of thousands of people have died for lack of a kidney? Dr. Fry-Revere is the first Westerner ever to witness firsthand Iran's organ procurement system. She shares what she discovered in this fascinating book: part diary of living in a dangerous country, part ethnographic essay, and part tale of people working together to overcome death and financial ruin. *The Kidney Sellers* is a shocking, thought-provoking true story. "Sigrid Fry-Revere has given us an amazing, courageous, provocative, even dangerous look at the complex and generally successful system of selling/donation that has solved the kidney supply problem in Iran. Eloquently, humorously written, it is one of my best reads in years. The book will be fascinating to anyone who loves a good travel adventure story, but essential for anyone interested in overcoming the organ transplant problem that costs thousands of lives each year." --Robert Veatch, Ph.D., Professor of Medical Ethics at the Kennedy Institute of Ethics and Fellow of the Hastings Center (In 1983 Dr. Veatch testified before Congress in favor of outlawing kidney sales.) "The Kidney Sellers is exciting, well written, and insightful. This book is going to revolutionize the way we think about living kidney donation." --Harvey Myself, Founder, Living Kidney Donors Network "The Kidney Sellers offers an invaluable and hopeful contribution to a long-standing controversy. This book is a must read for anyone who wants to take improving donation rates seriously." --Jim Gleason, UNOS board member, TRIO (Transplant Recipients International Organization) president "The Kidney Sellers is exciting, well written, and insightful. This book is going to revolutionize the way we think about living kidney donation." --Harvey Myself, Founder, Living Kidney Donors Network "The Kidney Sellers offers an invaluable and hopeful contribution to a long-standing controversy. This book is a must read for anyone who wants to take improving donation rates seriously." --Jim Gleason, UNOS board member, TRIO (Transplant Recipients International Organization) president From the Author *The Kidney Sellers* has helped launch the living organ donors rights movement in the United States.
