Joint Commission : The Life Safety Book before purchasing it in order to gage whether or not it would be worth my time, and all praised The Life Safety Book:

Fire safety is so important in a health care setting that the Joint Commission has devoted a new standards chapter to it. The Life Safety Chapter is designed to make both life safety compliance and evaluation easier. Its structured to directly reflect the Life Safety Code and the National Fire Protection Associations code to help organizations protect patients, staff, and visitors from threats posed by fire. And its right in synch with the Joint Commissions Statement of Conditions (SOC), the tool through which organizations can create Plans for Improvement (PFIs) to address any deficiencies related to the Life Safety Code. The Life Safety Book: A Guide to Using the Joint Commission Life Safety Chapter and the Statement of Conditions helps organizations understand the relationship of the new Life Safety

Standards and the updated SOC and effectively use them to ensure patient and staff protection from the risk of fire. This comprehensive guide to fire safety is invaluable for facility managers in ambulatory, behavioral, critical access hospital, hospital, long term care, and home care/hospice settings.
