**Jeffrey Prottas : The Most Useful Gift: Altruism and the Public Policy of Organ Transplants (Jossey Bass/Aha Press Series)** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Most Useful Gift: Altruism and the Public Policy of Organ Transplants (Jossey Bass/Aha Press Series):

This First Edition of Statistics moves the curriculum in innovative ways while still looking relatively familiar. Statistics utilizes intuitive methods to introduce the fundamental idea of statistical inference. These intuitive methods are enabled through statistical software and are accessible at very early stages of a course. The text also includes the more traditional methods such as t-tests, chi-square tests, etc., but only after students have developed a strong intuitive understanding of inference through randomization methods. The text is designed for use in a one-semester introductory statistics course. The focus throughout is on data analysis and the primary goal is to enable students to effectively collect data, analyze data, and interpret conclusions drawn from data. The text is driven by real data and real applications. Although the only prerequisite is a minimal working knowledge of algebra, students completing the

course should be able to accurately interpret statistical results and to analyze straightforward data sets.
