**Nathaniel Altman : The New Oxygen Prescription: The Miracle of Oxidative Therapies** before purchasing it in order to gage whether or not it would be worth my time, and all praised The New Oxygen Prescription: The Miracle of Oxidative Therapies:

A guide to the latest research in oxygen therapies and their use on the path to optimum health Presents new clinical advancements and scientific findings from Cuba, Italy, Spain, Russia, China, and the United States Explores the

effectiveness of oxidative therapies for treating many conditions, including heart disease, cancer, HIV, hepatitis, diabetes, MS, macular degeneration, herniated discs, arthritis, Alzheimers, Crohns, candida, emphysema, and eczema. Includes new research on oxidative therapies in veterinary medicine and dentistry, including its success in treating cavities and preventing infection. Scientists now agree that most disease states are caused by oxygen starvation at a cellular level. Polluted air, devitalized foods, and poor breathing habits can all lead to chronic oxygen deficiency, a bodily environment in which toxins thrive as the overall immune response is weakened. Through oxidative therapies--the medical use of ozone (O<sub>3</sub>) or hydrogen peroxide (H<sub>2</sub>O<sub>2</sub>)--we can assist the body in generating the oxygen needed to oxidate viruses and bacteria as well as weak and sick tissue cells, so stronger and healthier cells can take their place. Presenting the latest advancements and clinical findings from Cuba, Italy, Spain, China, Russia, and the United States, as well as recommendations from the International Scientific Committee of Ozone Therapy (ISCO<sub>3</sub>), Nathaniel Altman explores the effectiveness of oxidative therapies for treating a wide range of conditions, including heart disease, herpes, HIV, diabetes, candida, tonsillitis, macular degeneration, herniated discs, burns, and arthritis. He shows how Cuban and Russian physicians have been successfully treating patients with heart disease with ozone therapy for decades and explains how ozone interacts with cells when introduced into the bloodstream, stimulating the body's own ability to fight cancer, osteoporosis, and hepatitis. He investigates promising new studies on the use of ozone and hydrogen peroxide therapies to treat Alzheimers, Crohns, multiple sclerosis, emphysema, eczema, and sepsis and the potential for these therapies to successfully treat new diseases such as Ebola and Zika. The author also explores the expanding use of oxidative therapies in veterinary medicine and dentistry, including their success in treating cavities and preventing infection. Providing a detailed resource section, he explains how to combine oxidative therapies with holistic methods, such as fasting, detox therapies, herbal medicine, and nutritional healing, for a stronger start on the path to optimum health.
