Harold A. Stein MD MSC(Ophth) FRCS(C) DOMS(London), Bernard J. Slatt MD FRCS(C), Raymond M. Stein MD FRCS(C), Bernard J. Slatt, Raymond M. Stein, Harold A. Stein : The Ophthalmic Assistant: A Guide for Ophthalmic Medical Personnel before purchasing it in order to gage whether or not it would be worth my time, and all praised The Ophthalmic Assistant: A Guide for Ophthalmic Medical Personnel:

0 of 0 people found the following review helpful. This book satisfies all the topics which a student of ...By CustomerThis book satisfies all the topics which a student of Eye Care Technology needs to study. We at St Philip's College San Antonio Texas selected this book for students to buy for their course.3 of 3 people found the following review helpful. Ophthalmic AssistantBy Larry R. Huffman Jr.This is a very easy read as far as text books go. It was

very helpful for my test. Good set up and excellent review section with each chapter.0 of 0 people found the following review helpful. Very Good BookBy claudiaAlthough it is not the lasttest edition , it is still a very good book.I really learned a lot from it.

Thoroughly revised and updated, *The Ophthalmic Assistant: Fundamentals and Clinical Practices* provides ophthalmic assistants with comprehensive information on all aspects of ophthalmology. This 900-page, heavily illustrated book covers basic information on eye care delivery followed by clinical skills and equipment usage. Includes entirely new information on glaucoma medication, cataract surgery, pharmacological agents and refractive surgery.Provides up-to-date coverage of the equipment used every day.Includes subspecialty equipment used for glaucoma, eye surgery, diagnostic testing and refractive surgery. Provides the latest information on important topics such as phacoemulsification, fluorescein angiography, MRI, and pediatric ophthalmology.Features 16 valuable appendices, a color atlas of common disorders and a glossary for quick reference.Includes chapter outlines and self-review questions that help assistants locate needed information and test their knowledge in each area.Incorporates new information on refractive surgery, pharmacological agents, and glaucoma medication.Provides new surgical techniques in cataract surgery and changes in post-op management and cardiopulmonary resuscitation.
