Pauline Griffiths, Gail Mooney : The Paramedic's Guide to Research: An Introduction before purchasing it in order to gage whether or not it would be worth my time, and all praised The Paramedic's Guide to Research: An Introduction:

0 of 0 people found the following review helpful. excellent resource By mindy carruse this to adjunct my course work
0 of 0 people found the following review helpful. basic book - very useful in education By RASKU TUIJA Mclear, basic book - very useful in education. Thank You :)

"This is an excellent text which covers all of the important research methods in the field, including randomised control trials. A strong component of the text is the inclusion of chapters on ethics and the future of paramedic research... The use of paramedic examples throughout the chapters will help students and other budding paramedic researchers connect with the subject matter and help them link theory, evidence and practice." Professor Peter O'Meara, La Trobe Rural Health School, La Trobe University, Australia This practical book provides a no nonsense guide for student and qualified paramedics looking to understand the key elements of research, and what it means for their profession. The authors explain key concepts and methodologies to help you get to grips with the nature of paramedic research and how it works in practice. By drawing on a wealth of cases and examples, research is placed firmly in the context of clinical practice. The book will enable you to critique research and to engage in small-scale research projects of your own. Emphasising what you need to know, the book includes information on:

- Knowledge that underpins practice
- Key elements of qualitative and quantitative research
- Research ethics and evidence based practice
- Undertaking a literature review
- Dissemination of research findings
- Considerations of the future for paramedic research

Written by experienced lecturers, the authors offer practical advice and tips to more advanced researchers on getting work published and giving oral and poster presentations at conferences. Contributors: Jayne Cutter, Gary Rolfe, Megan Rosser, Julia Williams, Malcolm Woollard

About the Author Pauline Griffiths is Senior Lecturer, Director of Pre-qualifying Studies, College of Human and Health Sciences, Swansea University, Wales. Pauline has a clinical background in neuroscience and acute medicine. Gail P Mooney is Director of Postgraduate Studies, College of Human and Health Science, Swansea University, Wales. Gails clinical background is in critical care having worked in a number of intensive care units.
