Randy Danielsen, Ruth Ballweg, Linda Vorvick, Donald Sefcik : The Preceptors Handbook for Supervising Physician Assistants before purchasing it in order to gage whether or not it would be worth my time, and all praised The Preceptors Handbook for Supervising Physician Assistants:

0 of 0 people found the following review helpful. Essential reading for every Physician Assistant!!By Sherry MartinRandy Danielsen and coauthors have done it again!! This book is very informative, thorough, easy to read and concise. The book begins with the initial concept of a PA and the professional evolution to current day. The authors

guide you through the steps in developing, and keeping, a cohesive physician-PA team that benefits the ultimate consumer, the patient. I believe this book to be unbiased and informative for everyone who wants to learn about the PA profession. Although a PA for 20 years, I learned at least one thing (usually many) in every chapter. This book is superb and highly recommended. 1 of 1 people found the following review helpful. A Useful Resource!!

By Catherine S. Kittrell
As a Physician Assistant in a busy Emergency Department we have students from a variety of PA Programs throughout the country do their Emergency Medicine rotation in our department. The Preceptor's Handbook, serves as a useful tool, to draw their diverse skills and experiences together. As an ER group, we have found that we have improved our communication with the students, and often refer them back to the handbook to seek answer and stimulate learning. Multiple specialty groups in our hospital often say, "I want to hire a PA but I don't really know how I would utilize them", we refer them to the handbook. We have even placed one in the hospital library. This handbook answers specific questions for both the supervising physician and the PA!

By David A. Wayne
Not only is this book excellent for Physicians working with Physician Assistants, but it also provides a wealth of information about the Physician Assistant profession, including its growth and specialization. It delves into ethical issues and provides very specific instruments to help with evaluations of the PA's working in doctor's offices. The book divides responsibilities of the PA and the Physician into easily understood areas that are of great assistance. A highly recommended book for this important arena.

The Preceptors Handbook for Supervising Physician Assistants is a helpful guide for clinical preceptors of physician assistant (PA) students during their educational program and for physicians who supervise PAs in their practice. This work encompasses the experience and passion of four dedicated PA educators with combined experience of over 100 years. This indispensable resource addresses current practice as well as future projections and provides guidance for new styles of supervision in evolving health care systems including distance supervision, supervision in teams, and patterns of supervision in home care and geriatrics. Covering a wide variety of topics including supervision in the team environment as well as in individual practice, this handbook will provide the physician and physician assistant with the information and skills needed to be an excellent preceptor for students and a supervising clinician for graduate PAs. Features Case Studies Job Descriptions Performance Agreements Evaluation Tools Professional Improvement Plans

The uniqueness of the physician-PA team paves the way for effective physician assistant practice. The Preceptors Handbook: A Guide to Supervising Physician Assistants presents a comprehensive model to help physicians reap the benefits that PAs bring to their practice, their patients, and the health care team. This clear and accessible resource provides step-by-step guidelines for building relationships with PAs, including tips on how to hire and work effectively with a PA, how to give constructive feedback, and how to apply coaching strategies. The authors, all leaders in PA education and practice, provide the essential information for building and sustaining a successful physician-PA team." ~ Janet J. Lathrop, MBA President, National Commission on Certification of Physician Assistants (NCCPA)
