Andrew Davies PhD DSc, Carl Moores BA BSc MBChB FRCA : The Respiratory System: Systems of the Body Series, 1e (NAB Executive Technology Briefings) before purchasing it in order to gauge whether or not it would be worth my time, and all praised The Respiratory System: Systems of the Body Series, 1e (NAB Executive Technology Briefings):

Part of the ground-breaking Systems of the Body Series aimed principally at those on the 'new' medical curriculum, this textbook on the respiratory system covers the structure and function of the system and its major

diseases. Integrated coverage of the structure, function, and major diseases of the respiratory system highly suitable for systems courses Coverage of the basic science that is clinically driven a common clinical presentation introduces each major topic Clinical cases that are used and explained in the chapter Coverage of major diseases of the respiratory system that equips students for early contact with patients A structure that encourages learning objectives are defined at the beginning of the chapter, and self-assessment questions are provided at the end

"...this book is a comprehensive breakdown of the respiratory system...As it states, medical education has changed to a systems-based approach, which this book is nicely designed for." 4th Year Medical Student, Rectum - Leeds University Student Medical Magazine, March 2004
